1. This Office action is in response to amendment filed 1 June 2005, which papers have been placed of record in the file.

2. Claims 2-3 and 5 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Claim 3 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a servo pattern recording method comprising the position information of the head detected in the second servo pattern recording step is recorded on the magnetic disk during the second servo pattern recording step, as presented in the environment of claim 3. It is noted that the closest prior art, Szita ('084), shows a servo pattern recording method similar to the claimed invention. However, Szita ('084) fails to disclose the position information of the head detected in the second servo pattern recording step is recorded on the magnetic disk during the second servo pattern recording step as claimed.

Claim 5 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a servo pattern recording apparatus comprising means for detecting the position information of the head and recording a second servo pattern for positioning the head based on the detected position information, and also recording the position information of the head, as described in Figure 10 and specification p. 17, line 1 through p.18, line 4 and presented in the environment of claim 5. It is noted that the closest prior art, Szita ('084), shows head gimbal assembly testing similar to the claimed invention. However, Szita ('084) fails to disclose the position information of the head detected in the second servo pattern recording step is recorded on the magnetic disk during the second servo
